Ti experiments and discussions, students understanding of these concepts and I real-world problems.	loration; and Physics, ing static electricity, of electrical energy along hrough virtual s will deepen their	Hybrid	February 2 - June 22	\$714/17 classes
SNC2D Science (New)	Grade 10 Weekday Course	Monday 7:00-8:30pm	real-world problems. This course covers four core areas: Bit learn about the structure and function of and systems; Chemistry, focusing on the reactions and the application of acid-bit Space Science, analyzing the impacts potential effects on ecosystems and sc.	of cells, tissues, organs, ne principles of chemical ase reactions; Earth and of climate change and its	Hybrid	February 2 - June 22	\$714/17 classes
	weekday Course		studying the properties of light, including phenomena. Through virtual experime will deepen their understanding of thes them to real-world situations.	ng reflection and refraction nts and analysis, students se concepts and apply	·	·	
	Grade 11 Weekday Course	Wednesday 5:30-7:00pm	This course covers four core mathema Functions, where students will learn at representation, and inverse of function between algebraic and graphical repre- function transformations; Exponential for operations with rational exponents, the	out the definition, s, explore the relationship sentations, and apply Functions, focusing on graphing of exponential	Hybrid	February 4 - June 24	\$840/20 classes
MCR3U 11 Functions (New)	Grade 11 Weekend Course	Saturday 10:30am-12:00pm	functions, and their applications; Trigor	nometric Functions, where the sine and cosine laws, periodic relationships; rsive sequences, and series, along with their gh these studies, students	Hybrid	February 7 - June 27	\$840/20 classes
CBISH 44 C	Grade 11 Weekday	Saturday	their applications. This course covers core biological con students will learn about cell structure, Biochemistry, focusing on the essentia their roles; Ecology, studying the flow cycles in ecosystems; Genetics, explor	cepts: Cell Biology, where function, and cell division; I molecules of life and of energy and material ring gene transmission,	Era - :	Eshrur	6040/00
SBI3U 11 Biology (New)	Course	Saturday 1:00-2:30pm	mutations, and the principles of genetic Biology, examining the structure and fu body systems. Through experiments a will enhance their scientific inquiry skill foundation for future studies in biology. This course covers core concepts in Pi	c engineering; and Human inction of various human nd discussions, students s and lay a solid hysics: Mechanics, where	Hybrid	February 7 - June 27	\$840/20 classes
SPH3U 11 Physics (New)	Grade 11 Weekday Course	Tuesday 5:30-7:00pm	students will learn about forces, motion and Newton's laws; Energy and Work, transformation, the law of conservatior mechanical work; Waves and Sound, u propagation, frequency, amplitude, and sound; and Electromagnetism, studyin	n, velocity, acceleration, exploring energy of energy, and understanding wave if the characteristics of g current, voltage, Ohm's	Hybrid	February 3 - June 23	\$840/20 classes
			law, and the basic principles of electron experiments and problem-solving, stuct analytical skills, understand the fundar phenomena, and lay a strong foundation physics. This course covers core concepts in C and Structure, where students will lear	lents will enhance their nentals of physical on for further studies in hemistry: Atomic Theory			
SCH3U 11 Chemistry (New)	Grade 11 Weekday Course	Tuesday 7:00-8:30pm	and Structure, where students will lear atoms, electron configurations, and pe Reactions, exploring types of reactions reaction rates; Solutions and Solubility properties of solutions, concentration, solubility; and Acids and Bases, study reactions, and applications. Through e problem-solving, students will develop practical skills, deepen their understan processes, and lay a solid foundation f	riodic trends; Chemical s, stoichiometry, and focusing on the and factors affecting ing their properties, xperiments and their analytical and ding of chemical	Hybrid	February 3 - June 23	\$840/20 classes
MHF4U 12 Advanced Functions (New)	Grade 12 Weekday Course Grade 12 Weekend	wednesday 7.00-o.30pm	studies. This course will help students gain a diapplication of advanced mathematical properties of functions, including polyn logarithms, tigonometric functions, an Students will learn how to analyze func	eep understanding and concepts, focusing on the omials, exponents, d inverse functions.	Hybrid	February 4 - June 24 February 7 - June 27	\$840/20 classes
MCV4U 12 Calculus & Vectors (New)	Course Grade 12 Weekend Course	Saturday 2.30-4.00pm	transformations, and applications. This course will help students master t calculus, with a focus on the fundamer applications of limits, derivatives, and when the calculate the derivatives of the calculate the ca	he core concepts of tall theories and vectors. Students will of functions and explore	Hybrid Hybrid	February 7 - June 27 February 7 - June 27	\$840/20 classes \$840/20 classes
	Grade 12 Weekday		their applications in real-world problem. The course will also cover vectors, incloperations, and applications in various. This course covers the core concepts a focus on electromagnetism, dynamic Students will learn the properties of ele	is, such as optimization. uding their properties, fields. of advanced physics, with s, and modern physics. ictric and magnetic fields		·	
SPH4U 12 Physics (New)	Grade 12 Weekday Course	Thursday 5:30-7:00pm	and master the propagation of electror applications. The course will explore as force and motion, such as the relations energy, and impulse. This course delives into core concepts topics such as organic chemistry, chem	nagnetic waves and their dvanced principles of the petween momentum, of chemistry, focusing on nical kinetics, and	Hybrid	February 5 - June 25	\$840/20 classes
SCH4U 12 Chemistry (New)	Grade 12 Weekday Course	Thursday 7:00-8:30pm	equilibrium. Students will learn about the nomenclature, and reactions of organic the application of reaction rates, chemen thermodynamic principles. The course acid-base reactions, electrochemistry, modern chemical technologies.	ne structure, c compounds, and master ical equilibrium, and will also explore	Hybrid	February 5 - June 25	\$840/20 classes
